TO-GO CONTAINERS

As of 1/2020, to-go container manufacturers that are certified by BPI must be fluorinated (PFAS) chemical free. San Anselmo/Fairfax Ordinance mandates compostables (unlined paper/fiber based) must be BPI certified or Fluorinated Chemical free.

Currently there are not many choices that comply. There will be more choices that comply becoming available in the coming months.

4/20/2020 - Covid-19 has caused for shipment delays in Vanguard products.

REUSABLE TO-GO SYSTEMS

(We do not support containers made from bio or fossil fuel based plastic because they contain harmful chemicals that seep into food)
